More and more scientists, confronted with startling, cutting-edge evidence from many areas of research, no longer believe the universe just happened or that life arose by mere chance. Behind a universe of staggering complexity, they are seeing signs of a Master Designer. Are your science textbooks still telling you the same facts that Lee's did years ago? Prepare to be astonished by what some of today's most respected experts have to say about: * The birth of the universe * Darwinism and the origin of life * The astounding fine-tuning of the cosmos * Amazing molecular machines and DNA research Weigh the evidence for yourself. Then consider this question: Could it be that the universe looks designed .because it is?.
