Survey on a Shoestring: A Manual for Small-Scale Language Survey

By Frank Blair

Sil International, Global Publishing. Paperback. Book Condition: New. Paperback. 133 pages. Dimensions: 8.8in. x 6.0in. x 0.3in. This manual has been prepared to train people with little background in social research methodology. It demonstrates how a sociolinguistic survey can be carried out on a small scale without access to the sort of funding sometimes available to national language planners and spells out how those primarily concerned with local languages can learn to make informed decisions about language choice at local levels. More than an instruction booklet, Survey on a Shoestring provides invaluable background on bilingualism and language use and attitudes. Readers learn how bilingualism develops and is maintained in different situations, and the implications of this. Several methods for testing dialect comprehensibility are described in considerable detail, along with the advantages and disadvantages of each. This book is one of those rare resources that combines academic sophistication with what-do-I-do-next realism. I regard it as a major contribution for the conduct of sociolinguistic surveys in general. I cannot imagine doing survey research in sociolinguistic myself or allowing one of my students to begin a sociolinguistic survey without it. Professor Ralph W. Fasold, Georgetown University

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It has been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.

-- Beverly Hoppe

Extremely helpful for all classes of individuals. Better than never, though I am quite late in starting to read this one. I realized this publication from my father and dad suggested this ebook to discover.

-- Adela Schroeder II
