

Self-Regulation and Motivational Beliefs in Mathematics Achievement

Filesize: 9.43 MB

Reviews

*A new eBook with a brand new point of view. It really is written in basic words and not confusing. I discovered this publication from my i and dad recommended this book to find out.

SELF-REGULATION AND MOTIVATIONAL BELIEFS IN MATHEMATICS ACHIEVEMENT

LAP Lambert Academic Publishing Okt 2011, 2011. Taschenbuch. Book Condition: Neu. 220x150x8 mm. This item is printed on demand - Print on Demand Neuware - The purposes of this study are to investigate how mathematics achievement can be explained in terms of motivational beliefs (intrinsic goal orientation, extrinsic goal orientation, task value, control and learning beliefs, self efficacy for learning and performance and test anxiety), self-regulated learning components (cognitive strategy use and self-regulation), gender and school types and to determine the differences between two gender (girls and boys) and two school types (public schools and private schools) with respect to the variables above in the subject domain of mathematics. The study was conducted in Istanbul and Ankara, two largest cities of Turkey. Motivated Strategies for Learning Questionnaire (MSLQ) and Mathematics Achievement Test (MAT) were used. By using Linear Stepwise Regression and MANOVA, some important results were reached. One of these results is that the combined effect of three predictor variables (school type, self-efficacy and intrinsic goal orientation) on students mathematics achievement was significant. In other words, school type, self-efficacy and intrinsic goal orientation are important in mathematics achievement. 132 pp. Englisch.
